

# LAZAR BUKEJLOVIC

## FULL-STACK ENGINEER

📍 Dubrovnik, Croatia

## PROFILE

Full-Stack Engineer focused on React/TypeScript product delivery, frontend architecture, and backend-connected workflows. Delivered 15+ client and portfolio projects from scoping to production across fintech, digital assets, travel intelligence, and operational tooling. Builds dashboard-heavy products with authentication, APIs, database-backed features, payments, responsive UX, and deployment-ready code for remote product teams.

## EXPERIENCE

### TokenFlow

February 2025 - Present

#### Full-Stack Engineer

- Build client-facing web applications with React, TypeScript, Node.js, REST APIs, authenticated flows, and production-ready UI across active product streams.
- Deliver dashboard views, form-heavy workflows, responsive layouts, API-driven data views, route handling, and loading/error/empty states from handoff to deployment.
- Turn product requirements and client feedback into scoped tasks; ship features, debug flows, refactor components, and maintain clean Git/GitHub workflows.

### ScaleRoad LLC

December 2023 - February 2025

#### Full-Stack Software Engineer

- Improved product UX and platform reliability through tailored frontend components, authenticated workflows, and API-connected views.
- Built dashboard-driven features for records, payments, subscriptions, and operational status using React, TypeScript, Node.js, and PostgreSQL.
- Reduced manual workflow friction with structured web interfaces that made client operations easier to track, review, and manage.
- Owned delivery across planning, UI build, backend integration, QA, bug fixing, and launch-ready polish.

### Private Clients

June 2023 - December 2023

#### Freelance Full-Stack Engineer

- Delivered 15+ custom web applications for private clients in finance and digital asset environments, turning operational needs into internal tools.
- Built authenticated dashboards, CRUD-style data views, payment/subscription-related flows, and responsive frontend experiences.
- Managed end-to-end freelance delivery: scope clarification, feature planning, implementation, testing, deployment, and client handoff.

## SELECTED WORK

|                               |                                                                                                                                                                                 |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Professional Personal Website | Portfolio platform with visual resume, responsive project presentation, live project links, contact flow, and resume integration.                                               |
| AtlasBrief                    | Flagship destination intelligence platform with React, TypeScript, Supabase, Stripe, auth, saved briefs, watchlists, stay planner, billing, alerts, reports, and production QA. |
| GeoRisk                       | Geopolitical risk intelligence dashboard for conflict monitoring, market impact, historical context, and simulated humanitarian relief tracking.                                |
| DevPath Hub                   | Developer growth platform for structured portfolio and career workflows, project planning, and resource-driven UX.                                                              |
| EchoRoom                      | Social/developer conversation platform with feed interactions, messaging, discovery flows, and live activity-oriented interface design.                                         |
| ForgeDesk                     | SaaS/workspace product with protected admin-style flows, e-commerce/product management UX, and Stripe checkout positioning.                                                     |
| Foundry Studios               | Booking/reservation product centered on service scheduling, payment-oriented flows, and polished customer-facing booking UX.                                                    |

## TECHNICAL SKILLS

|                |                                                                              |
|----------------|------------------------------------------------------------------------------|
| Frontend:      | React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS              |
| Backend:       | Node.js, Express, REST APIs, API Integration, Authentication & Authorization |
| Data/Payments: | PostgreSQL, Prisma, Supabase, Stripe API                                     |
| Workflow:      | Git, GitHub, Vercel, Responsive UI, Loading/Error/Empty States, QA/Debugging |
