

LAZAR BUKEJLOVIC

FULL-STACK ENGINEER

PROFILE

Full-Stack Engineer focused on building and stabilizing React/TypeScript product interfaces, frontend architecture, and backend-connected workflows.

Works across frontend quality, API behavior, authentication, payments, and user-facing reliability in fintech, travel intelligence, operational tooling, and SaaS-style products.

Strong in turning unclear requirements into shipped features, debugging active issues, communicating tradeoffs clearly, and delivering production-ready web applications for remote teams.

EXPERIENCE

TokenFlow

February 2025 - Present

Full-Stack Engineer

- Build and maintain client-facing web applications with React, TypeScript, Node.js, REST APIs, authenticated flows, and production-ready UI across active product streams.
- Own frontend-heavy product work from handoff to deployment, including dashboards, forms, responsive layouts, API-driven views, route handling, and loading/error/empty states.
- Work through active tickets and client feedback by isolating frontend/API issues, debugging broken flows, communicating tradeoffs, and shipping scoped fixes without blocking delivery.

ScaleRoad LLC

December 2023 - February 2025

Full-Stack Software Engineer

- Improved product UX and platform reliability through tailored frontend components, authenticated workflows, and API-connected product views.
- Built operational dashboards for records, payments, subscriptions, and status tracking using React, TypeScript, Node.js, and PostgreSQL.
- Reduced manual workflow friction by turning business processes into structured interfaces that were easier to track, review, and manage.
- Owned delivery across planning, UI build, backend integration, QA, bug fixing, production checks, and launch-ready polish under shifting requirements.

Private Clients

June 2023 - December 2023

Freelance Full-Stack Engineer

- Delivered 15+ custom web applications for private clients in finance and digital asset environments, turning operational needs into internal tools.
- Built authenticated dashboards, CRUD-style data views, payment/subscription-related flows, and responsive frontend experiences.
- Managed end-to-end delivery from scope clarification to deployment, including requirement changes, client feedback loops, debugging, QA checks, and handoff.

SELECTED WORK

Professional Personal Website	Portfolio platform with visual resume, responsive project presentation, live project links, contact flow, and resume integration.
AtlasBrief	Flagship destination intelligence platform with React, TypeScript, Supabase, Stripe, auth, saved briefs, watchlists, stay planner, billing, alerts, reports, and production QA.
GeoRisk	Geopolitical risk intelligence dashboard for conflict monitoring, market impact, historical context, and simulated humanitarian relief tracking.
DevPath Hub	Developer growth platform for structured portfolio and career workflows, project planning, and resource-driven UX.
EchoRoom	Social/developer conversation platform with feed interactions, messaging, discovery flows, and live activity-oriented interface design.
ForgeDesk	SaaS/workspace product with protected admin-style flows, e-commerce/product management UX, and Stripe checkout positioning.
Foundry Studios	Booking/reservation product centered on service scheduling, payment-oriented flows, and polished customer-facing booking UX.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Express, REST APIs, API Integration, Authentication & Authorization

Data/Payments: PostgreSQL, Prisma, Supabase, Stripe API

Workflow: Git, GitHub, Vercel, Active Ticket Delivery, QA/Debugging, Production Checks, Responsive UI, Loading/Error/Empty States
